poldauer

TPU Foil for Violin/Viola

No glue   Perfect adhesion

Special foil for your **poldauer** shoulder rest

- If your violin has a rougher textured varnish It may not be possible to attach the Poldauer shoulder rest reliably to the back of the instrument. We have therefore developed an ultra-thin TPU foil to create an optimal smooth surface. TPU is an inert, non-reactive thermoplastic which attaches without sticking. It also has no effect on the instrument's sound.

- **Warning: The foil can only be used once and cannot be re-applied.**

- **Please take plenty of time to find the optimal position of the shoulder rest for you before you decide where to place the foil.**
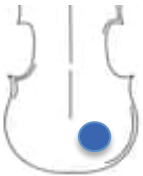

INSTALLATION GUIDE

a) **Only required for instruments with uneven surfaces where the suction cup won't attach reliably.**

b) **Only attach when the optimal position has been found.**

1. clean the instrument's surface carefully with a fine cloth
2. peel the protection layer off the adhesive side (step2)
3. carefully place the TPU foil where required (step 3)
4. finally peel the protection layer off (step 4)
5. the foil remains in position when the Poldauer shoulder rest is attached or removed.
6. when required, the foil may be removed by pulling the tap. It cannot be reused and a new one would be needed.
